

FLASH START 700 12V

Overview

FLASH START 700 12V

cod. 829567

12V batteryless starter (ultra-condensers technology).

It starts a large fleet of vehicles even at low temperatures. No maintenance required: Flash Start exploits the residual battery power to start the vehicle.

It can be charged via USB or a 12V cigarette lighter socket.

GLOW function for starting diesel engines at low temperatures.

Protection against short-circuits and polarity reversal.

Supplied with a charger cable with cigarette lighter plug (12V) and a hexagonal wrench (for the battery terminals on-board the vehicle).
